OBJECTIVE

I am final year btech student .Looking for an opportunity to work with a company which provides me an opportunity to enhance my knowledge and skills as well as contribute in the growth of organization.

EDUCATION

2014- 2015	Secondary school Shree shyam senior secondary school,bhadra 83.17
2016- 2017	Senior secondary school Shree shyam senior secondary school,bhadra 75.60
2019- 2023	Btech Guru jambeshwar University science and technology,hisar

PROJECTS

1. Created an Analog clock using HTML,CSS and JavaScript

We will create three files(Html,css and JavaScript file),we also have an image of the clock that will be used in the background and on top of that,we will make an hour , minute and second hand.

HTML: It is simple file having the basic structure of the webpage and ID for the clock's body .

CSS: The css is used just for making the clock actually look a bit nicer.

JavaScript: The js file will provide the logic behind the rotation of the hands.

2. Supermarket Billing System using C++

TRAINING

Industrial Training | ESCI in collaboration with PDQ softtech

Learned web development technologies like Html ,Css, Bootstrap
